

GESER DEMOLITION

We are the best choice for all your demolition and excavation needs – with experienced staff, our own equipment and materials.

Our fleet of vehicles allows maximum reliability.

Our many years of experience in this field ensure a minimum effort of organisation.

Our seasoned personnel guaranty the highest efficiency with maximum safety.

Our gravel works also provide suitable material on demand.

Demolition work always requires special precautions and sophisticated safety measures. These in turn need extensive experience to ensure the safety of people, adjacent objects and passing traffic. With 55 years of professional experience in this area as well as in construction, earth-moving and heavy haulage projects, you can rely on us for a hundred percent.

Demolition of the former Red Cross building at Regensburg Stobäusplatz; the project took six months. Centrally located on a Regensburg junction, this project required the utmost caution and sophisticated safety measures so as not to affect traffic or passers-by. The floor area that underwent the work was approximately 30,000 m².
